

ASSIGNMENT - DAY 5 (Databases)

SQL Set Operators Assignment -

1. Produce a list of jobs for departments 10, 50, and 20, in that order. Display the job ID and department ID by using the set operators.
2. Create a report that lists the employee IDs and job IDs of those employees who currently have a job title that is the same as their job title when they were initially hired by the company (that is, they changed jobs but have now gone back to doing their original job).
